PROFESSIONAL SUMMARY

MERN Stack Developer with 3 years of professional experience building scalable full-stack web and mobile applications. Skilled in MongoDB, Express.js, React.js, React Native, and Node.js. Experienced in secure REST API development, JWT authentication, payment gateway integration (Stripe, PayPal), workflow automation, role-based access control, and AI-powered messaging systems including WhatsApp chatbots and voice agents. Delivered production-ready solutions for e-commerce, hospital management, and enterprise event organization platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, React Native, Redux Toolkit, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Webhooks, Cron Jobs

Database: MongoDB, Mongoose

Integrations: Stripe, PayPal, Twilio, Meta APIs, ElevenLabs, Google Calendar API, InfoBip, WAAPI, Firebase Authentication

Tools and Deployment: Git, Vercel, Heroku, Workflow Automation

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Growmify

March 2024 – Present

- Developed scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js for clinic operations and appointment management systems.
- Designed and implemented secure REST APIs with JWT authentication to protect user data and enable reliable client-server communication.
- Integrated Stripe, PayPal, Twilio, and WAAPI for payment processing, messaging, and automated workflow management.
- Automated appointment reminders and background tasks using Cron Jobs, reducing manual effort and improving system reliability.
- Built administrative dashboards to monitor users, appointments, transactions, and system logs in real time.

PROJECTS

E-Commerce Platform | MongoDB, Express.js, React.js, Node.js, Stripe, PayPal

- Built a full-stack e-commerce platform enabling administrators to manage products and customers to purchase items online.
- Integrated Stripe and PayPal payment gateways with secure transaction handling and order status tracking.
- Developed responsive product catalog, shopping cart, checkout, and order history features using React.js and Redux Toolkit.

TalkRight – Hospital Management System | MongoDB, Express.js, React.js, Node.js, ElevenLabs, Twilio, Meta APIs, Google Calendar, Stripe, InfoBip

- Developed an end-to-end hospital management platform supporting doctor onboarding, shift scheduling, and calendar-based appointment booking.
- Integrated AI voice agent using ElevenLabs, WhatsApp chatbot using Twilio and Meta APIs, Google Calendar API, Stripe payments, and InfoBip messaging.
- Automated appointment reminders and AI-driven responses to reduce no-shows and streamline clinic operations.

Shepherd – Event Organization Platform | MongoDB, Express.js, React.js, Node.js, Role-Based Access Control

- Designed a role-based event organization system where each user is restricted to actions permitted by their assigned role.
- Implemented multi-stage request approval workflows allowing sequential review cycles until event organization is completed.
- Built admin and user dashboards to track request status across every stage of the event organization process.

EDUCATION

Bachelor of Science in Information Technology | Government Post Graduate College Gujranwala

2022

Intermediate in Computer Science | Government Post Graduate College Gujranwala

2018

Matriculation (Science) | The Pakistan School Gujranwala

2016

LANGUAGES

English, Urdu
