

ABAI DULLAH

Full-Stack Developer — MERN, React Native & AI Automation

mr.abaidullahrajpoot@gmail.com | [+92 301 4701330](tel:+923014701330) | [linkedin.com/in/abaidullah-rajpoot](https://www.linkedin.com/in/abaidullah-rajpoot) | abaidullah-portfolio.netlify.app | Gujranwala, Pakistan

PROFESSIONAL SUMMARY

Full-Stack JavaScript Developer with 4 years of experience, progressing from React Native mobile development into full-stack MERN engineering and applied AI automation. Architected and shipped AI voice agents, WhatsApp chatbots, and calendar-based booking systems, alongside secure REST APIs, JWT authentication, and 6+ third-party integrations spanning payments (Stripe, PayPal, Google Pay, Apple Pay), messaging (Twilio), and voice AI (ElevenLabs). Delivered end-to-end platforms for healthcare, e-commerce, event management, and logistics, including a live hospital booking system with AI voice and WhatsApp automation used in real clinic operations, plus 2 production apps published to the Google Play Store and Apple App Store.

TECHNICAL SKILLS

Frontend & Mobile: JavaScript (ES6+), React.js, React Native, Redux Toolkit, HTML5, CSS3
Backend & Database: Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Authentication, RBAC, Webhooks, Cron Jobs
AI & Automation: ElevenLabs (Voice AI), Twilio, Meta WhatsApp Business API, WAAPI, Infobip, Workflow Automation
Integrations & Tools: Stripe, PayPal, Google Pay, Apple Pay, Google Calendar API, Firebase (Auth & FCM), Google Maps API, Git, Vercel, Heroku

PROFESSIONAL EXPERIENCE

MERN Stack Developer — Growmify

March 2024 – Present

- Build and maintain full-stack clinic operations and appointment management platforms (MongoDB, Express.js, React.js, Node.js), including TalkRight, an AI-powered hospital management system used in live clinic operations
- Architect and integrate an AI voice booking agent (ElevenLabs) and a WhatsApp chatbot (Twilio + Meta APIs) into TalkRight, letting patients book appointments by phone call or WhatsApp message
- Connect 6+ third-party services, including Google Calendar, Stripe, and Infobip, to automate scheduling, billing, and appointment reminders that reduce no-shows and manual front-desk work
- Develop a full-stack e-commerce platform with Stripe/PayPal checkout, a responsive product catalog, cart, and order tracking
- Own end-to-end delivery of Shepherd, a role-based event organization platform with multi-stage approval workflows and admin/user dashboards tracking status at every stage
- Implement secure REST APIs with JWT authentication and role-based access control, and maintain real-time administrative dashboards for users, appointments, and transactions

React Native Developer — Techcon

September 2022 – March 2024

- Built a rider operations app (daily activity tracking, digital salary slips, in-app support chat, push notifications) and an event ticketing platform (multi-ticket purchases, media gallery, coupons) in React Native
- Integrated Stripe, Google Pay, and Apple Pay for in-app payments, and Apple/Google login for secure authentication across production apps
- Added Firebase push notifications (FCM), Google Maps-based location features, and real-time support chat to improve user engagement
- Shipped 2 production apps to the Google Play Store (Android) and Apple App Store (iOS)
